

Minutes of Monthly Meeting M.D. Battle River No. 423

The Council of the Mun. Dist. of Battle River No. 423 met in the office of the said district on Thursday, 18th October. Full Council present, Reeve R. D. Smallwood in the chair.

Moved by Mr. Dalton that minutes of Sept. 8 be accepted as read. Crd.

Moved by Mr. Blakley that relief be issued to Geo. McLean for \$15.00 until Nov. 10, 1938. Crd.

Moved by Mr. Smallwood that this Council accept the 54 bushels wheat as full share of lease of Thos. Bronson re N.W. 3- and S.W. 10-44-9- for 1938 and that Council release their share of the 130 bushels of rye and balance of wheat due and the proceeds of the 54 bushels of wheat be applied on the arrears of taxes. Crd.

Moved by Mr. Blakley that the report of Mr. Dalton re cattle damage to M. Roth's crop by C. Steele's cattle be accepted. Crd.

Moved by Mr. Blakley that motion 435 of Oct. 13 be rescinded. Crd.

Moved by Mr. Smallwood that as there is a difference of reports between Cra. Dalton and Steele as damage committee re cattle damage of C. Steele to M. Roth crop, that their reports be tabled and taken up later in the meeting. Crd.

Moved by Mr. Smallwood that in regards to cattle damage to M. Roth's crop the following damages be assessed: Mr. Steele \$12.51 each for 8 cows, \$1 each for 4 yearlings and \$1 for 4 calves. Mr. Steele \$2.51 each for 2 cattle. Mr. Adams \$1 for 1 head of cattle. Mrs. King \$1 for 1 head of cattle, and Sec'y be instructed to collect. Crd.

Moved by Mr. Blakley that the deposit of \$2 protest of cattle damage fees be refunded to C. Steele. Crd.

Moved by Mr. Steele that the proposal of Mr. J. A. Bell re W. 4 and N. E. 26-44-9- to pay the arrears of taxes and interest to date be accepted and the agreement of sale be extended to Nov. 1, 1939. Crd.

Moved by Mr. Steele that Mr. Jas. Stead be compensated an amount up to \$10 for damage done to his car by striking a rock on roadway between Sec. 16- and 18-44-9- and an account for same not more than \$10 be presented for payment. Crd.

Moved by Mr. Stewart that the report of the Reeve and Sec'y re Thos. Shaw F.C.A. Act be accepted. Crd.

Moved by Mr. Steele that this Council accept the Prov. Gov't. scheme re \$2000 road work project by accepting 2 for 1 basis, that is, \$2000 be applied on arrears of Mun. taxes and \$1000 be paid to the workman by the Prov. Gov't. in Tax Remission Certificate and that the Prov. Gov't. allow a further 25% of the \$1000 for material and breakages. Motion lost, recorded as follows: Yeas, Mr. Steele; Nays, Messrs. Smallwood, Stewart, Blakley, Collette and Dalton.

Moved by Mr. Smallwood that the Sec'y write the Minister of Mun. Affairs giving him a full statement as to the interest paid to date on the purchase price of the S. 1/4 9-46-9- by Mr. Archibald and his offer for a reduction of \$75 on the amount of taxes, interest and principal owing, if paid in full. Crd.

Moved by Mr. Collette that the Reeve and Sec'y be appointed as a committee to interview the Mun. solicitor re damage claim of H. Farthing for horse damage on road work. Crd.

Moved by Mr. Collette that the sum of \$264.75 now in the Hospital be paid over to the Wainwright hospital board to be applied to the balance of 1931 Requisition owing said hospital. Crd.

Moved by Mr. Blakley that Sec'y be empowered to force continuation of collection of Hosp. tax arrears until the balance of the 1931 Requisition is paid in full. Crd.

Moved by Mr. Stewart that Sec'y be instructed to sell all wheat now in storage in the name of the M. D. of Battle River through the Wheat Board and issue receipts to parties under lease or agreement, applying proceeds to the proper accounts. Crd.

Moved by Mr. Smallwood that correspondence re Albert Walker from the B.C.M.P., Wainwright Detachment be received and filed for reference. Crd.

Moved by Mr. Steele that the approval of Bylaw No. 59 and the approval of said Bylaw form as approved by the Minister of Mun. Affairs be received, and on receipt of Form B approved by the Minister, that Bylaw No. 60 received its third and final reading as to S.E. 28-45-7, w. 4th mer. Crd.

Moved by Mr. Dalton that report of Reeve and Sec'y re Prov. Gov't road work program, McLean and the S.E. 16-45-8- Berquist relief, Greenhough re mixing station acct., and H. Burdon hospital acct. be accepted and filed for reference. Crd.

Moved by Mr. Blakley that Sec'y notify the Dept. of Mun. Affairs that Mrs. Berquist has not presented herself to the Mun. Council at their meeting of Oct. 13 nor on the committee appointed to handle the case for the purpose of relief requirement. Crd.

Moved by Mr. Smallwood that the Sec'y write Mr. Purvis re claim of G. B. Sawyer N.W. 24-45-9- that this Council consider the amount of \$15 per acre is far too high for this kind of land where roadway is taken but will appoint a person if he will appoint a person to agree to a reasonable price. Crd.

Moved by Mr. Steele that the letter from the R. hospital re accounts be received and Sec'y acknowledge receipt of same. Crd.

Moved by Mr. Stewart that report of M. D. Askin re weed inspection be accepted as read and filed. Crd.

Moved by Mr. Collette that report of Mr. Dalton re Russian thistle be accepted and that weed inspector be sent to Mr. S. M. News' for information and to enforce the Weed Act as to Sec. 35-46-8- w. 4th Crd.

Moved by Mr. Steele that the circular from the Bureau of Relief re relief issuing be accepted and filed for reference. Crd.

Moved by Mr. Blakley that Sec'y notify Wainwright Mun. Hosp. that this Council do not consider B. Kennedy indigent and hospital notice be filed. Crd.

Moved by Mr. Stewart that application for Tax Consolidation on the S. E. 34-46-9- be approved. Crd.

Moved by Mr. Dalton that application for Tax Consolidation on the E. 1/4 25-45-7- be approved. Crd.

Cowboy "Yodelling Contest" Dance

Monday, October 31st

— in —

KIEFER'S HALL, IRMA

NEWS ITEMS
FROM JARROW

Mr. J. C. Carlett of Edmonton, spent several days in Jarrow last week visiting Mr. and Mrs. H. Barton and renewing old acquaintances.

Rev. J. P. Berry of Edmonton preached in the Kinsella and Jarrows churches last Sunday to appreciative audiences.

Mrs. Wm. Morgan had her sale of household effects last Friday. She with her four children left on the ferry Sunday morning for Marble Mountain, Wash., U.S.A., to join the rest of her family, where they will reside in the future.

An aunt of Mrs. Ed. Peet from Victoria, B. C., was a recent Jarrows visitor.

Mr. W. Boyd, with the children and Miss Janet McNabb, motored to Hanna to spend Sunday and Thanksgiving Day with relatives.

The annual chicken supper will be held on Friday, Nov. 4, in the Jarrows Community Hall. Come and enjoy a good supper and program.

Mr. and Mrs. W. Garden of Quinte visited Mr. and Mrs. J. Waite recently.

A baby girl was born to Mr. and Mrs. Wm. Hoffman on October 4th in the Viking hospital.

Rev. and Mrs. Griffith attended the Presbytery meeting which was held in the Irma United Church last Thursday.

Mr. Chas. Lison is now a pupil in the Jarrows school, since his parents have moved to the Tate farm.

Despite the frosty nights, which have put an end to the beautiful flowers, the days still continue warm and bright. Surely this is "Sunny Alberta."

OBITUARY

KEITH MCBRIDE

Keith McBride, four-year and one-month-old son of Mr. and Mrs. Clive McBride, died in Viking hospital on Wednesday, Oct. 12.

He leaves to mourn his loss, father and mother, two little sisters and grandparents.

A large attendance gathered for the funeral service held in the Kinsella United Church on Saturday afternoon, Oct. 15, conducted by the Rev. R. W. Griffith. Burial took place in the Kinsella cemetery. Our heartfelt sympathy goes out the strictest to parents in their bereavement.

Minutes of Monthly Meeting M.D. of Buffalo Coulee

Oct. 8, 1938.—Council meeting was held in Saltan school with Cra. Hetherington, Pheasey, Ramsey, Hills, Daw and Curry present. Reeve Pheasey presiding.

Minutes of Sept. 10 were adopted as read on motion of Cra. Hetherington.

Several seizures and collections considered.

Hospital notices for the month were read. Sec'y to advise hospital that Eric Ellis and Mrs. Sam Greer are not ratepayers and Reeve to interview Kellar.

Correspondence read re Eskil Johnson. No action.

A letter was read from O. S. Longman re estimates of amount of grass seeds required for 1939 under forage seedpolicy.

Secretary is to order seeds up to 50% of the funds available.

Matter of horse vaccine discussed and report made re collections.

Discussion re Geo. Pollard's crop and payment of Seed Grain and report made by Cra. Ramsey re creditor's meeting in Wainwright. Cra. Hetherington to try to see if anything can be done re crop.

Cr. Daw carried that Reeve and Deputy be delegates to the annual convention in Calgary and that they be allowed \$30 each for expenses. Cra. Hetherington carried that Cra. Hills be alternative delegate.

A letter was read from the Assessor asking for a payment of \$100 on account. Cra. Ramsey carried that \$100 be paid.

Nothing having been heard from the Dept. re Tax Remission Certificate, Sec'y was instructed to write Hon. W. A. Fallow on motion of Cra. Daw.

It was agreed that Div. 3 is to be given \$5 extra apportionment re S. Proser.

Several time sheets and accounts were ordered paid.

Cr. Hills carried the adjournment. Roy W. Hay, Sec'y-Treas.

WAINWRIGHT MAN IS KILLED BY TRAIN

Wainwright, Oct. 19.—Frank Stranahan, 50, was killed near here Tuesday at 4 p.m. when the car which he was driving was struck by a passenger train, westbound to Edmonton. The car was carried about 75 feet by the engine.

Mr. Stranahan had lived in the Battleville district, north of Wainwright, for 20 years. At the time he was killed Mr. Stranahan was distributing handbills advertising an auction sale of his farm and household goods, preparatory to his retirement to his native state of Kansas. One son survives him there, the other son predeceasing him at Wainwright three years ago.

Kinsella Kernels

The Kinsella Ladies' Aid wish to thank all those who gave chickens, etc., to the Aid for the anniversary supper, and also to those who helped wait on tables.

Several children in the pupple and high school rooms were vaccinated and inoculated by Dr. Haworth on Monday.

Mr. E. C. Williams is building a new addition on the north side of his store.

The World of Wheat

By H. G. L. STRANGE
Director, Research Dept., Empire Grain Company, Limited

The whole world has had a miraculous escape from a devastating war. Had war occurred, millions of lives would have been lost. Billions of dollars worth of property would have been destroyed. The danger came because of the determination of Germany to acquire new lands.

Some people consider that the German—and one can add to this the Italian and Japanese—motives are those of unwarranted aggression, of a love for war.

A study of Hitler's books and speeches, however, and of matters underlying worldwide economy, convinces me, at least, that the real motive actuating the aggression of Germany, Italy and Japan is simply that of a desire to secure the essential foodstuffs and raw materials necessary for the welfare of their people and which products today are denied to them, in the quantities they need, by the high tariff policies of the democratic countries of the world.

The way to satisfy Germany and other "have-not" countries, and so to avoid war in the future, in my humble opinion, is simple. It is to reduce existing high tariffs, and so permit the exchange of more raw materials and foodstuffs of the farmers for more of the goods and commodities of the world's industrial workers.

LEGION MEETING

The Irma Branch of the Canadian Legion and the Ladies' Auxiliary held a general meeting in the Legion hall last Saturday evening. Comrade Henry Carter, who has served the Irma branch of the Legion for several years as secretary-treasurer, tendered his resignation as he and a part of his family are leaving soon for Vancouver, B. C. On behalf of the Branch, Comrade President Fr. McGraw expressed regrets at losing another one of the faithful members. A hearty vote of thanks was extended to Cde. Carter for his past services.

On calling for nominations for secretary-treasurer, Cde. W. T. Steele received the honor and was declared elected by acclamation for the remainder of the year.

Arrangements were made for the sale of poppies, commencing Nov. 5, and for the Armistice service in Kiefer's hall on Nov. 11th. The usual dance will also be held on the evening of November 11th.

"We can use both capital and people in the West of Canada, preferably they should arrive together, but if one must come first, it should be the capital."

Last Link in The Western Section Of Trans-Canada Highway Near Completion

The last link in the Trans-Canada Highway between Winnipeg and the Pacific coast will be forged with the completion of the final stretch of the "Big Bend" highway, which is being built around the great northern bend of the Columbia River between the towns of Golden and Revelstoke, British Columbia. Only 15 miles of the 180-mile highway remain to be constructed, and efforts are being made to have the road open to traffic in 1939. At present a daily railway automobile transport service in each direction between Golden and Revelstoke enables motorists to bridge the unfinished gap. Reports received so far this year indicate that the all-Canadian route from the prairies to the Pacific is particularly popular with visiting motorists.

The "Big Bend" highway passes through a magnificent mountain region, within sight of snowfields, glaciers and all the other charms of a truly alpine world. For the greater part of the way, the road skirts the Columbia River, affording splendid views of the snow-capped Selkirk Mountains and of the giant peaks which form part of the main divide of the Rockies. About 60 miles north of Donald, British Columbia, the road passes through one of the finest stands of virgin timber in the country. Here giant cedar trees, having butts from six to ten feet in diameter, rise high above the sides of the roadway, along with the specimens of Engelmann spruce which reach a height of 150 feet. Stately firs from three to four feet in diameter are also found in scattered groups.

The completion of the "Big Bend" highway will provide a direct all-Canadian route from Schreiber, about 125 miles east of the twin cities of Port Arthur and Fort William in Western Ontario, and the Prairie Provinces to the Pacific coast, and will mean much to the development of tourist and commercial motor travel through the mountains of Western Canada. The only other, uncompleted section of the Trans-Canada Highway which will ultimately extend from Halifax, Nova Scotia, to Vancouver, British Columbia, a distance of approximately 3,500 miles, is that in north-western Ontario.

Rare Tropical Fish

Have Been Secured For Philadelphia Aquarium By Director

Brought back by Dr. Robert O. Van Deusen, Director of the Philadelphia Aquarium, nearly 1,500 tropical fish are displaying their rare colors, sizes and shapes to the public there.

Between 80 and 95 species are represented in the additions from the Gulf of Mexico, Dr. Van Deusen said. He was particularly proud of a hand-butterfly fish, first to be obtained by the Philadelphia aquarium, and considered very rare.

Other piscatorial oddities are two Queen Angles, so-called because their markings appear like a crown of blue stars on their heads; a large ocean triggerfish, "built like a submarine"; Spanish and red hogfish and yellow and black porfish.

Largest fish of the collection is a nurse shark, equipped with a mouth like a sucker instead of the usual elliptical rows of sharp teeth. Ten feet long, it dwarfs the inch-long Beau Gregoire and sergeant majors flashing about the tanks.

Another big specimen is a 20-pound black grouper, vying for attention with tropical porcupine fish, and many others.

A Matter Of Opinion

Two friends met in the street. One of them had had his arm broken in a motor accident and was carrying it in a sling.

"Say," asked the first, "it's too bad about your arm! How long will you have to carry it in a sling?"

The injured man shrugged.

"There's a slight difference of opinion about that," he replied. "My doctor says two weeks and my lawyer says twelve!"

Repaid For Kindness

A Chester, N.S., woman who played the good Samaritan last spring and befriended a "tramp" that knocked at her back door, asking for a meal, has received a substantial reward for her trouble. A letter from a sister of the wanderer told the Chester resident of his death and said she would "hear further." Shortly afterwards a cheque for \$3,000 arrived.

Sixty-three varieties of time are being used in different countries, daylight saving time not being included in the list.

Remarks Misunderstood

Welsh Conductor Explains His Statement About Music Teachers

Prof. Feestyn Davies, conductor of the Welsh Imperial Singers, who were fulfilling an engagement in Toronto, said his remarks expressed recently about Canadian music teachers were "unfortunately twisted."

Prof. Davies, in an interview, said it was "pitiful" to see so many fine voices in Canada ruined by poor teaching.

"I can assure you I was casting no reflection on the many undoubtedly excellent music teachers in Toronto when I spoke of good voices being spoiled by bad teaching," he said.

"I was lamenting the fact that so many pupils with good voices spoiled them by going to the wrong teachers."

"There are teachers in Canada as good as those anywhere in the world. In fact, they are probably better because they are better paid and ample remuneration will always attract the best in any profession. But at the same time, there are hundreds of good voices in the country being wasted because they are not receiving competent training."

Charcoal From Wood Waste

Plan To Utilize Large Quantities Of Wood Waste In Canada

Among the many problems that engage the attention of the Department of Mines and Resources is the utilization of the large quantities of wood waste that occur in lumbering operations in Canada. The manufacture of charcoal from this waste would help to solve this problem, if a local market could be found to absorb it. But charcoal, because of its bulk, cannot be transported any great distance economically, and there is only a limited demand in Canada, where it is chiefly used for lighting fires and for cooking. Other uses are in the manufacture of metallurgical products, chemicals, black powder and poultry food. It is also used in the purification of water, as a deodorizer, and deodorizer.

In Europe successful attempts are being made to use producer gas from charcoal as a fuel for heavy trucks. Such a fuel is considerably cheaper than gasoline, and, if adopted in Canada, would increase the demand for charcoal.

When wood is heated in the absence of air it decomposes, evolving gases, and leaves as a residue, charcoal. The earliest known method of making charcoal was to stack wood in beehive-shaped piles and cover almost completely with leaves and earth. By kindling a fire and regulating the air supply, part of the wood is burned, producing sufficient heat to convert the remainder to charcoal. This method is still used to some extent, but in modern distillation plants charcoal is produced by placing dry wood in steel ovens which are heated externally. The gases evolved, after passing through condensers, are further processed to yield valuable by-products, acetic acid and methyl alcohol.

Seize Narcotics

U.S. Customs Seizure On Shipments Valued At \$67,000

Buried deep in the coal bunkers of the Philippine steamship Don Jose, a United States customs searching squad at Portland, Ore., stumbled on 1,485 one-ten cent cans of narcotics, valued at approximately \$67,000.

The seizure was the second largest made in 40 years here, Customs Collector Fred Plank said. Largest was made July 25 when the motorship Granville yielded narcotics valued at \$100,000.

The ship is subject to a fine of about \$45,000.

Record For Stowaways

When the Normandie pushed her nose into the French port of Havre, she had on board fourteen stowaways—eleven Americans, two Estonians, one Mexican. Their capital, in American dollars, French francs, Estonian kroons and Spanish pesetas, totalled \$17.58. French line officials, disturbed by the incident, said the number of stowaways set an Atlantic crossing record.

"I hear you are going to be married, old man! I hope you'll be very happy."

"Well, I don't see why I should not. I came through the war all right."

Treated Fence Posts For Pastures

Popular Posts Dipped In Bluestone Are Used

In the 1938 development of 945,070 acres of community pasture in Saskatchewan under the Prairie Farm Rehabilitation Act program, 1,500 miles of fencing were required for the huge undertaking. All purchases of material for fence construction is usually made through merchants located within reasonably close proximity to the pasture area. The work in connection with fence construction is done by men residing within the municipality where the pasture is established.

An interesting feature is the use of bluestone-treated poplar posts, as exemplified by the Dominion Experimental Station at Matherberries in their experiments over the past 12 years. During that time the bluestone treatment has proved very satisfactory in preventing decay. The use of these posts in the community pastures may prove to be the forerunner of a market for some of the good northern Saskatchewan timber. In March 80,000 posts were ordered from the northern areas and after delivery at the shipping point were treated in May and June under an experienced inspector with copper sulphate (bluestone).

The method of treatment consisted of peeling the butts of the posts three to four feet and one strip of bark completely up the post. The post is then placed in an upright position on its butt in a wooden tank which contained about 12 inches of a saturated solution of copper sulphate. The posts absorb from one to two quarts of the solution, the colour of the bluestone showing at the top when the treatment is complete. The posts are then set aside to dry and can either be completely peeled or left to the weather. The posts last longer if peeled immediately after treatment. The time necessary to complete the treatment depends upon the weather. On hot days the solution will follow the sap to the top in six or seven hours. On dark cool days it may take 12 hours longer.

The sizes of the poplar posts used in the community pastures are 5-inch top, 7 feet long; corner-posts 8-inch top, 8 feet long. Standard community pastures have barbed wire strands with posts one rod apart. Reserve areas and irrigation canals are fenced with three to four strands of barbed wire with posts also one rod apart.

Federation Of West Indies

Idea Is Formulated With Object Of Ultimate Status Of A Dominion

A federation of the West Indies with the ultimate status of a Dominion was envisioned by R. W. Youngman, Jamaica delegate to the West Indies Chambers of Commerce congress at Trinidad. He was speaking on a resolution which urged establishment of better contact with the colonies by the British Colonial office. The resolution, which also urged that a senior colonial office officer should pay periodical visits to the colonies, carried unanimously.

Bananas From Denmark

A number of banana trees have been planted in Jutland and the first harvest has brought record prices in Denmark. Trees which were imported from Jamaica attained a height of 24 feet and the fruit is reported as excellent quality.

A ton of sugar cane yields about 100 pounds of raw sugar and three gallons of rum.

Growers Disappointed

First Crop Of Jan Ru Tomatoes Was A Failure

The Jan Ru tomato has let Canadian growers down with a thump. Developed by Janjick and Rumble of York Township, this tomato seemed to be the answer to the growers' prayer for a fruit that would enable this country to compete on the British market with Italian and Spanish tomatoes.

But instead of growing true to form, of developing into a firm, well-rounded product which could be neatly sliced in Britain, the Jan Ru has now turned out to be like any other Canadian tomato—good eating, but not able to keep its shape when taken from a can.

It is a mystery that has caused grey hairs among the growers and the officials of the Federal Ministry of Agriculture. And the only conclusion they can come to is that the seed was not "fixed," which means that the seed was still in the experimental stage.

The seeds were planted after distribution had been made by the National Horticultural Council to canners. It was clearly stressed that the seeds were still in the experimental stage, but the canners' thoughts were concentrated on getting them into the ground and letting nature get to work.

But something went wrong. Jan Ru seeds were planted, but the tomatoes were Jan Ru only in name. They turned out to be like any other Canadian tomato, entirely lacking the one quality that would make them attractive to Britishers, who like their grilled tomatoes to look neat. There was gloom among the growers and canners and some muttering. One firm paid \$60 a pound for the seed, as compared with the usual price of \$6 per pound.

Dr. Barton, Deputy Minister of Agriculture, said it was still his belief that the tomato was all that was claimed for it. That it did not come true to type in all cases was something unforeseen, one of those things which happen.

Some Ideas Not Practical

Many Good Ones Would Cost Too Much To Develop

"Are you going to put on the market your ice cream in cylinder shape?" I asked a manufacturer of ice cream, says J. C. Kirkwood, in Marketing. "We have not decided to do so," was the answer. "The machine required to make this shape would cost \$40,000, and we don't know yet whether this new shape is going to last."

Lots of good ideas don't last. The "Automatic" can opener, once advertised, was not the winning idea its makers imagined it was. Time was when a fortune was spent on advertising a composition sole for men's footwear, yet good old leather has survived its competitor, which has been allowed to die.

Variety Of Patterns

For years, states Neal O'Hara, in the New York Post, an Elgin, Ill., pig farmer combed through the city's garbage that was dumped at his piggery. When he married recently, he presented his bride with a 400-piece set of silver assembled from the knives, forks, spoons etc., that Elgin citizens had carelessly tossed in their garbage cans.

Doctor: "Your recovery is largely due to your own powers of resistance."

Scott: "Then you won't be charging me your full fee?"

Two Triangles Form Rich Design

Here's some magic for your crocheting that brings you lovely filet crochet. Two simple medallions made of ordinary string when joined form a variety of luxurious accessories. The medallions—they're just triangles—are simple designs set off by lace stitch. Bedspreads and cloths are lovely made of string. For such smaller accessories as scarf, buffet set or pillows, use a finer cotton. Pattern 6206 contains instructions and charts for making the medallions shown; illustrations of them and of stitches; materials needed.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Says U. S. Could Settle Labor Disputes As Easily As They Do In Britain

Aims To Please Guests

Manager Of Large Hotels Always Looking For New Ways

A man who began life as a dishwasher, strolled into one of London's luxury hotels. While occupying a suite of the kind usually reserved for millionaires, he will study what he calls the "set up" of that hotel.

The man is Ralph Hitz, of New York, manager of nine of the largest hotels in the United States. Swarthy, heavily built Mr. Hitz gave the "set up" of these hotels when seen at the Savoy (reporter a London Sunday Express reporter). Visitors arriving at a Hitz-managed hotel sign the register, little realizing that the clerk behind the desk has been trained to read upside down, with the result that he is greeted by name before the ink is dry. The visitor is flattered.

Mr. Hitz said that this feat was just one of 2,000 "set ups" at his hotels.

Page-boys at his hotels are equipped with cigarette lighters and leap to the visitor's side the moment he shows signs that he is about to smoke.

If there are children they are sure of free toys at a Hitz establishment. Guests are invited to furnish particulars of their birth, ostensibly to enable the manager to grant credit, but actually the information is wanted so that the person may be stalked through life with birthday greetings.

Mr. Hitz is particularly proud of his "Overnight Package." This contains night attire and toilet accessories lent to men or women guests whose luggage has been mislaid.

These outfits are lent without charge and are complete except that no razor is included. A man once used a Hitz hotel after cutting himself.

Patronize one of his hotels for 300 days and you become a Charter Guest, entitled to \$25 a day credit. Super customers of good standing receive a Gold Credit Card entitling them to unlimited credit.

One Essential Fact

Children Should Be Taught Honestly Is Its Own Reward

Two Fort Erie children, 14 and 10 years old, respectively, are \$50 richer because they were honest. A Buffalo man had been robbed of a pocketbook containing \$20 and a key case containing \$30. The thief kept the \$20; but, considering the key case was worthless, he threw it away without exploring to discover its contents. The children found the key case containing the money and voluntarily handed it over to the Chief of Police who returned it to the rightful owner. The Buffalo man rewarded the children handsomely with the gift of \$50.

The children deserve credit for their honesty, states the Chatham, Ont., News. They should be taught that it pays to be honest; and no doubt the Buffalo man was trying to impress this very lesson on their minds. It does pay to be honest, but the dividends are not always reaped in this material way. With such a handsome reward in their possession will the tender minds of these youngsters become impressed with the idea that honesty always brings rewards of this character? If in later years, they discover that persons towards whom they display honest tendencies do not always pay them so handsomely nor in the same way, will their ideas of honesty as a paying principle undergo a change? Honesty pays—but in the training of youth the essential fact should be impressed, that honesty is its own reward.

Ancient Chest

Dutch Chest Has Laid Unopened For 300 Years

Mystery of the contents of an iron Dutch chest that has lain unopened for 300 years in Gordon Castle, Fochabers, Morayshire, may soon be solved.

The chest was sold with other antiques. J. Duchart, Perth dealer, paid \$52 for it. He said it might be opened in a few days. Something lurked around inside when the chest is moved, he added.

It was found in the River Spey in 1748, near the spot where the Duke of Cumberland's army crossed the river en route to the Battle of Culloden.

White elephants automatically become royal property as soon as they are born in India. Such elephants are considered sacred.

President Roosevelt said that he hoped the United States could work toward that state of mind which permits settlement of labor disputes in Great Britain with a minimum of strikes and ill-feeling.

He made the assertion at his press conference in reply to a question as to how a report of a special commission on British employer-employee relations might be applied to proposed legislation in the United States.

Mr. Roosevelt said that in working out a law nothing could be accomplished by calling names and emphasizing violence of disputes. He added that he hoped employer-employee co-operation in the United States over a period of years would give Americans the same attitude toward labor problems as prevails in Great Britain.

The special commission told the President that British industry and labor maintain industrial peace through mutual confidence and co-operation.

Robert J. Watt, American Federation of Labor representative on the commission, said in a statement that the United States could not "hope to translate the practices relating to collective bargaining in Britain into our country overnight, because it is difficult to hitch a pair of horses to pull a truck."

"Asserting that the United States was in 'the horse and buggy stage as far as labor relations are concerned,' Watt gave as a cause 'the shortsighted bigotry of many reactionary employers.'"

Heavy Nitrogen

Rarest Gas In The World Now Being Manufactured

A new still that manufactures three quarts a day of the rarest gas in the world, heavy nitrogen, was announced by Columbia University.

Heavy nitrogen is made of rare molecules for use in the common collection that forms 80 per cent of the air. The ordinary nitrogen has one rare molecule to every 263 common ones. The "heavies" have an atomic weight of 15, the usual ones 14.

The difference, though small, is of great importance to chemists. The first use is to attach these rare molecules to food. There they replace ordinary nitrogen. They permeate the living tissues the same as the common nitrogen and because of their greater weight, their course through the body can be traced. Biologists are using this method to find out where nutrients go after digestion, and how long they stay in the body.

Whether commercial uses exist for the rare gas is not known, because up to now there has not been enough available for such experiments. Columbia's new apparatus can make a few weeks' enough to supply the world for several months at past rates of experiment.

In small quantities the rare gas has been available for barely two years. It was first separated by Dr. Harold C. Urey, of Columbia, under whose direction the new still has been perfected.

Just A Reminder

Dog Lets Minister Know If Service Is Prolonged

In a suburb of Salisbury (Rhodesia) there is a little church to which, each morning, with great regularity, there comes a man and his Alsatian dog. The man goes inside to worship and the dog lies outside to wait. If, however, the service lasts longer than 20 minutes, the dog puts his head inside the church door and looks inquiringly up the aisle toward the preacher.

Not A Bad Answer

"What is it that fine feathers make, Tommy?"

"I don't know, teacher."

"Oh, yes, you do know. Now think—fine feathers make fine—"

"I really don't know, teacher."

"Yes, you do, Tommy. It begins with the letter 'F'."

"Oh, yes—beds, teacher!"

Smart Chinese Students

In Peterborough, Ont., for the second time within a year the four Wong children, Chinese students at Lakefield high school, have made school history. Each placed first in his or her respective class and was awarded the general proficiency prize.

America sent the largest number of tourists to Britain last year, 158,000; France being next with 83,000.

The Price Of Peace

Peace, blessed peace, like the calm sweet quiet of a gentle summer's evening has descended upon us. And war—for a time—has by a miracle been arrested.

Now that the shriekings of anger and the shoutings of triumph—which somehow seem to turn to ashes in one's mouth—are over, we may, quietly examine the situation and determine: How did it all come about? Who are we to thank for the peace? Many world figures did a great deal.

Herr Hitler consented unexpectedly to wait until October 10th before completing his armed invasion of Czechoslovakia instead of making his march on October 1st.

Mr. Chamberlain of Great Britain and Mr. Daladier of France—Czechoslovakia's allies, and who had guaranteed her frontiers from invasion—demanded that Czechoslovakia accept Herr Hitler's drastic ultimatum and should give up the territories demanded by the Fuehrer (as though Canada should be pressed by her friends to give back Quebec to France and to give up parts of British Columbia to Japan).

Mr. Chamberlain and Mr. Daladier unquestionably endured hardships in flying to Herr Hitler to assure him he could have all he wanted peacefully if he would only not go to war.

Mr. Roosevelt wrote two statesmanlike messages reminding Herr Hitler that this was the tenth anniversary of the Kellogg pact by which Germany had renounced war.

Signor Mussolini graciously joined with France and Great Britain in urging Herr Hitler to wait nine days for his prize.

Much, therefore, was done for the sacred cause of peace, but neither Great Britain nor France gave up for peace any expropriated German colonies. Neither did Italy offer any conquered territory. But the people of Czechoslovakia, he said to their everlasting credit, really alone averted war by making supreme sacrifices. By suffering the deepest humiliation in seeing her allies stand idly by while her enemy, by the threat of armed force, seized Czechoslovakia's valuable frontiers, lands, mines and industries.

So, out of it all, we see Czechoslovakia alone made the sacrifices. That little country alone paid the bill. Her president, Dr. Benes, by his self control, his statesmanship and his willingness to suffer almost certain effacement from public life, was the one man who really brought peace to us all.

If any man in history ever deserved the Nobel Peace Prize, it is Dr. Benes. But what of Czechoslovakia? With frontiers now almost impossible to defend against Germany, with neighboring countries clamoring for more of her land, with her entire economic life disrupted, and with severe difficulties of earning a living facing her people.

Let us hope that Great Britain and France, who by Czechoslovakia's sacrifice have been saved the mass murder of millions of their men, women and children, and of the destruction of their fair cities, may in time see fit to recognize the extreme value of what they have gained, and will be willing, without stint and hand-somely, to assist the little beaten, humiliated and defeated country, to gain some measure of self respect; and by generous and unselfish economic agreements enable her to win a fair standard of living for her people.

During the late war, Czechoslovakian soldiers stood steadfastly shoulder to shoulder with the Allies against Germany. Let us hope that those sacrifices, and Czechoslovakia's recent ones, will not be forgotten.—Searle Grain Co., Ltd.

Growth of the Dairy Industry

Dairy factories are the source of more than two-thirds of the butter production of Canada and of approximately 90% of the cheese. They are also the source of a large and growing output of concentrated milk. The capital invested in the dairy factories of the Dominion is in the neighborhood of \$25,000,000. Creameries are most numerous with cheese factories second. The number of concentrated milk plants is small. The patrons of the three groups of factories combined number around 375,000. The

value of the output of all dairy factories last year was \$134,951,000.

The number of dairy factories operating in Canada last year was 2,558. Of this total 1,269 were creameries, 1,024 cheese factories, 241 combined butter and cheese factories, and 24 were engaged in making concentrated milk products. As compared with 1936, the number of creameries and combined butter and cheese factories had declined; but the number of concentrated milk plants and cheese factories had increased. In 1936 creameries numbered 1,288, butter and cheese factories combined 277, concentrated milk plants 22 and cheese factories 1,008. Owing to the tendency to build larger factories to serve larger areas, the number of plants has been declining for some years, though the total output has increased. Since 1917 the number of dairy factories has decreased from 3,418 to 2,558 in 1936, but in the meantime the value of the output of dairy factories has risen by 29%.

Investment figures for 1937 are not available; but in 1936 the capital employed in the 2,558 factories was \$25,000,000. Of this total land and buildings accounted for \$49,035,000, materials and products for \$6,253,000 and cash and accounts receivable for \$9,777,000. The number of employees in the industry in that year was 16,269 and the amount paid in salaries and wages was \$15,577,000. The number of patrons in 1936 was 376,158; of whom 6,849 were credited to concentrated milk plants, 22,147 to combined butter and cheese factories, 32,229 to cheese factories and 314,933 to creameries. The dairy factory industry paid its patrons in that year \$81,431,000; 72% to patrons of creameries, 14% to patrons of cheese factories, 9% to patrons of combination factories and 4% to patrons of concentrated milk plants.

The production of butter by creameries last year, according to the preliminary report on the industry, was 246,870,000 pounds, while the output of dairy butter was 113,084,000 lbs. The output of factory cheese was 130,228,000 lbs. Farm-made cheese 1,232,000 lbs. The value of creamery butter production was \$64,161,000 and of factory cheese \$17,925,000. The value of the concentrated milk production was \$10,078,000. Miscellaneous products of dairy factories in 1937 were valued at \$42,786,000. The largest items were ice cream—not including the output of the ice cream industry or the confectionery industry—\$6,889,000, cream sold \$5,010,000, and milk sold \$24,974,000. Other products of the dairy industry included: whey butter, whey cream, butter-milk, chocolate milk and ice cream mix. The total value of all products of the dairy factories last year was \$134,951,000, an increase of 11% over the 1936 figure of \$121,220,000.

NAME TADE S. C. CANDIDATE IN ATHABASCA

Colington, Alta., Oct. 18.—Clarence H. Tade was chosen at a meeting here Monday night as Social Credit candidate for the Athabasca provincial by-election November 7.

The Colington farmer won for Social Credit in the 1935 Alberta general election, but resigned to give a seat in the legislature to C. C. Ross, former Minister of Lands and Mines, whose death a short time ago made the by-election necessary.

The choice was made jointly by the selection committee of the provincial government—Premier Aberhart, Hon. N. E. Tanner, Minister of Lands and Mines, and Hon. Lucien Maynard, Minister of Municipal Affairs—and an advisory board of Athabasca riding Social Crediters.

Harvest festivals, auction sales, bazaars, quilting bees and sewing bees are again among the activities of the fall season in the countryside. It all follows a bountiful harvest and the spirit of good fellowship is seen all about us. Picture palaces are crowded with folks who want to relax from the harvest work and dwell for a few hours in the realm of make-believe. Coal bins are being filled for the winter months to come, and radios are tuned in on any number of fine programs that fill the air. Checks are getting easier as the frost quickens the blood stream and lagging footsteps take on a sprightlier pace. It's fall in Alberta, and it can't be best anywhere in the world.

Use thin slices of devil's food cake to make summer ice cream sandwich. Serve chilled consommé from its can. Garnish with a light sprinkling of chopped parsley and a thin slice of lemon.

Blend equal amounts of chopped raisins and peanut butter for a sandwich that is different. Drop a clove of garlic into a bottle of olive oil. Let it stand until the oil is well saturated with the flavor, remove the clove and use the oil for salad dressings.

Successful Teachers' Convention Held at Holden October 7th

On Friday, October 7, all but one of the teachers employed in the Holden District gathered at Holden for a one-day convention. An invocation by Mr. Bell and a welcome from Mayor White of Holden opened the convention. The chairman of the Holden Divisional school board, Mr. J. W. Stambaugh of Bruce, addressed the teachers, reminding them of their privilege and responsibility in shaping the minds of the future citizens. A talk was much enjoyed from Mr. Dean of Viking, as president of the District A. T. A. Miss Thacker of Holden gave a much appreciated demonstration of the teaching of Choral Singing in the Intermediate grades.

At the morning business session the reports of the committees on Festival and Salary Schedule were heard and approved and many of the teachers' problems were brought up and left over for a more detailed discussion in the afternoon. Inspector J. H. McLean told of the psychology which had led to the school curriculum, reminding us that education should not be the learning of facts but the learning of how to interpret and use the facts. He felt that as teachers we should never forget this.

The afternoon session opened with a paper by Miss S. Gilbert on the Background of the Activity Program in which she told about some of the struggles which led to the finished course. This was followed by a description of the methods and results of various enterprises by Miss I. Robinson, Mrs. E. Steen, Mrs. H. Duncan, Miss A. Hall, Miss R. Wingrove, Mr. I. Olsen and Mr. F. J. Condon. Mrs. S. Clark of Viking gave a demonstration of a Speech Training lesson in Division 1 which was a revelation of what could be done with that subject. An example of Folk dancing by pupils trained by Miss Anne was thoroughly enjoyed as was also a half hour physical training lesson given by Mr. Stuffer to nine boys from his school. Mr. Brown of the University Extension Department showed two educational films and made us all hope that this ideal method of teaching will soon be available in every school.

The afternoon business session opened with an election of officers for the District A. T. A. which resulted in: President, Mr. Chalmers of Holden; Vice-President, Mr. McDonnell of Field; Secretary-Treasurer, Mr. J. Hemphill of Bruce; Press Correspondent, Miss Collier of Bruce. A committee to deal with the matter of the Salary Schedule was made up of Mr. Chalmers, Miss F. Milne and Mr. Olsenberg. It was decided that a musical festival should be held each spring in one of the towns included in the district and Holden was selected as the place for the spring 1939. Mr. McLean, Mrs. Selkirk and Mr. Broughton were chosen as the Festival committee. A motion was passed that in future the Games and Track meets should be separate, with the Games meet taking place in Viking this spring; Mr. Dean to be chairman of the committee in charge.

At 6:30 the teachers met again to enjoy a chicken dinner and a well proportioned mixture of sense and nonsense in the afternoon speeches. The toast to the King was made by Mr. Hemphill; to the Teaching Profession by Mr. McLean, the response by Mr. Chalmers; to the Department and its representatives by Mr. Richardson and the response by Mr. McLean. Dr. H. E. Smith, associate professor of the School of Education, spoke on Education versus Indocination, taking indocination to mean simply propaganda. He said that a teacher can either give a child the knowledge of the past or he can give the child this knowledge together with today's events and, what is most important, try to teach the child to evaluate these; that only from this second method can social progress result.

The day was ended with a dance in the delightfully decorated hall. Credit for an exceptionally successful convention goes to the convention committee: Mr. J. H. McLean of Holden; Miss Signe Anne of Holden; Mrs. S. Clarke, Viking; Mr. J. A. Richardson, Ryley; Mr. L. Olsen, of Gladstone; and to the chairman, Mr. W. M. McDonnell of Tofteld, as well as to those others who spent much time and trouble in decorating the hall and arranging displays of Enterprise, Social Studies and Science.

Decorate a lettuce salad with tiny pearl onions for a change. When preparing asparagus, do not cover the utensil in which it is being cooked. In this way the natural color of the asparagus is preserved.

Left-over fish can be added to salad dressing. When mixed with pickle relish, it makes a good filling for stuffed eggs. Meat can be used the same way.

Laying for the EAST

The East Likes Western Poultry to the Tune of Nearly \$2,000,000 a year

Not only do Western hens lay for the East to the extent of over 50,000,000 eggs a year, but over 6,000,000 lbs. of them, and their consorts, go East in person to grace the dining tables of Eastern industrial workers.

The East needs the West to feed it. The West needs the East as a market for its produce; so the two work together — the East by spending over \$40,000,000 a year with the Western farmer, and the West — by buying Canadian-built cars.

And that's a point worth remembering, for every car bought in the West helps not only the food-consuming automobile worker — it keeps men working and on payrolls in the rubber, paint, glass, steel, parts, chemicals and many other Eastern industries, to the ultimate advantage of the Westerner himself.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lansden Building, Toronto.

AUTOMOTIVE INDUSTRIES

Soup

A Few Noodles by Tun
"Do you charge for children?" asked a lady as she started to board the bus here yesterday. "Under five we do not," replied the driver. "Well, I've only got three," she replied.

"You've been drinking; oh, I can tell," said a young married woman here to her new husband. "Well, don't do it 'n' dear," he replied. "Let's keep it a family secret."

Heard among the ladies at the social: "I hear Mrs. . . . has decided to go on a drastic diet." "Does she have to cut out food to retain her figure?" "No, to retain her husband."

The postage stamp reveals the secret of success, says a careful observer. It sticks to one thing until it gets there.

Heard at the dance: "You say they live like cats and dogs?" "Yes, when she acts kittenish, he growls."

Heard in an argument at the street crossing: "You walk as if you own the street." "You drive as if you own the car."

"My ancestors came over in the Mayflower," declared a young lady at a social function. "Yes, but the immigration laws are stricter now," replied one of her friends.

Winning Answer
An enterprising Florida newspaper offered a year's subscription for the best answer to this question: "Why is a woman like a newspaper?" Here are some of the answers: Because you can't believe anything they say. Because they are thinner now than they used to be. Because they are easy to read. Because they are well worth looking over.

Because back numbers are not usually worth what they cost. Because they always have the last word. Because they carry the news wherever they go.

But the crowning answer of all and the one to win the subscription was this:

Because every man should have one of his own and not run after his neighbor's.

DRESSED FILLETS OF HADDOCK

1 cup of milk
1/4 cup of flour
1 tablespoon of mustard
2 cups of grated old Cheddar cheese
2 tablespoons of butter
fresh chopped parsley
Preheat a white sauce with the butter, the flour, the mustard, and the milk; add the grated cheese, season. Wrap the fillets with a damp cloth, cut in individual pieces, cover each piece with the cheese mixture, sprinkle with chopped parsley, place on well buttered oven dish, and cook 20 minutes in moderate oven. Fillets of any other kind of Canadian fish may be used instead of Haddock fillets.

THE KIDNIE'S EYES will sparkle when you bring in an appetizing platter of Fish. It's a dish fit for a king, with its delicious, palatable flavour . . . yet so inexpensive that you will have money left over for extra-meal-time treats.

You can enjoy Canadian Fish and Shellfish all the year 'round — over 60 different kinds — fresh, frozen, smoked, dried, canned or pickled . . . as often as you wish. Many tempting recipes make it easy for you to offer delightful variety to hearty appetites.

Viking News Items

At a meeting held in Viking on Wednesday, September 28th, it was decided to form a branch of the Canadian Boy Scouts among the boys of Viking. Following this meeting, announcements were made and a meeting of the boys took place on the following Tuesday with a representative group of boys present. At this gathering, a committee was formed and the Rev. Mr. Lester was chosen to act as Scoutmaster for the senior division of the Scout group and the Rev. Mr. Anderson to take charge of the junior group. Mr. Atkinson has kindly consented to act as Assistant Scoutmaster with Rev. Mr. Lester. An assistant has not yet been found for the juniors.

In order to raise sufficient funds to procure needed literature, flags and other equipment, it was decided to hold an Apple Day on the first Saturday of November. The newly-formed Scout troops will be in charge of the sale of apples, and they ask a generous response on the part of the citizenry.

The Boy Scout movement is especially established for the benefit of boys. Within the scope of its activities are interests sufficiently diversified to satisfy the tastes of every boy. Its objective is to give the boys useful, interesting and formative training that will enable them to become, in the future, representative citizens. A movement such as this cannot fail to have the accord and encouragement of the citizens of Viking, and they are asked to lend their support to the boys in a whole-hearted manner.

A McLaren, pioneer resident of this district, passed peacefully away at his home here on Thursday, October 13, at 3 o'clock in the afternoon, after a few months illness which confined him to his home.

Funeral services were conducted by Rev. H. G. Lester, pastor of the United church, at the Elks Community hall on Sunday afternoon, Oct. 16, at 2:30 p.m. The large hall was filled with sorrowing relatives, old-time friends and neighbors who listened with rapt attention to a message of hope and consolation delivered by the pastor, who also spoke of the hardships and pleasures of those who pioneered this western country, and the kindly spirit of neighborliness that characterized the early settlers. Assistance in the service were the choir of the Anglican and United churches. Three hymns were sung: "Nearer My God to Thee," "Rock of Ages," and "Abide With Me." A quartette consisting of Mrs. Lefsrud, Miss Vivian Richards, Mr. A. E. F. Cary and Rev. Lester, sang "The Old Rugged Cross." A mass of beautiful floral tributes were banked on the platform behind the casket.

Attending the annual Diocesan convention of the Catholic Women's League, held at Vegreville on Friday, Saturday and Sunday, were: Mrs. A. Streit, Mrs. Pohoda, Mrs. J. L. Slavik, Mrs. Frank Slavik, Mrs. M. Sullivan and Mrs. M. Powell. Others motoring over on Sunday and attending the banquet were Rev. Fr. O'Neill, Mr. and Mrs. Finn, Mrs. Lar Kelly, Mrs. Gaudet, Bruce, Mr. and Mrs. F. Piche, Mrs. Piche, Kinsella, Mrs. J. Golka, Mrs. L. Lonowski and the Misses Mary Slavik, M. Streit, Josephine Klonka, Clara Golka and M. Kelly.

Mr. and Mrs. Lars Hagenson are the proud parents of a daughter born at the University hospital, Edmonton, on Saturday, October 15th. Friends of Mrs. A. G. Andrews in this district were saddened to hear of her sudden death at the Killam hospital on October 9th, following an operation for appendicitis. Sympathy is extended to Mr. Andrews, former M.L.A. for Sedgewick constituency, in his great loss.

Another pioneer resident of Viking district, Halvor Nelson Aamot, passed away at the local hospital on Saturday, October 15. Funeral services were held at the Scandinavian church, southwest of town on Monday afternoon by Rev. Mr. Stoles, when a large number of neighbors and friends gathered to pay their last respects to one who had lived among them for many years and will be missed by many as a kindly Christian gentleman and friend. Burial took place in the church cemetery. Pall bearers were Messrs. R. W. Armstrong, Carl Knudsen, Axel Strom, John Sather, O. Wenstob and O. Widdall.

At a meeting of the Viking branch of the Canadian Legion held on Saturday evening last, it was decided to hold a Memorial Service in the Elks Hall, Viking, on Friday, November 11th, at 2:30 p.m.

A banquet for returned men, wives and lady friends, will be held in the dining room of the Viking Hotel in the evening at seven o'clock. Tickets will be on sale shortly.
Allan Harper, of Jarro, was a business visitor in town Monday.

World of Sport

By H. B. C.

The six-day bicycle race that brought thousands of fans to the arena in Montreal last week, ended with the Peden brothers of Victoria taking the long end of the prize money. In their ride to "nowhere" they covered 2332 miles, 9 laps, a distance that would take one to Chicago, Detroit and Toronto from Viking. It takes real stamina to maintain such a terrific speed over this great distance. This is the 32nd victory for the red-headed William Peden who now is established as the greatest rider of all time by reason of this long list of successes. "Rah for the Canadians!"

At the Inter-University track meet on Saturday, the Alberta boys ran away with the honors, with Manitoba coming second and Saskatchewan third. The victory of the home boys was largely due to the performance of Ian Cook, who made 20 of the 62 points all by himself. In the high jump he didn't bother taking off his sweater to top the field, but to show just what he could do, then stripped and established a record by sailing over the bar at 6 feet plus almost 2 inches.

In a letter from a friend at Detroit, we are told of an hour's chat with the great Hank Greenberg. Just after he had hit his 58th home run of the season. The banquet at the Leland hotel that evening must have upset Hank for he was unable to his another homer the rest of the season and consequently left Babe Ruth with the honors of 60.

It is reported that Napoleon that he regretted no "kind dagger" had ended his career at the height, like that of Caesar, to properly preserve his greatness. Possibly Babe Ruth feels likewise today, when after establishing himself on the pinnacle of fame he now becomes the great "unwanted" man. No one man ever before attracted so many thousands of spectators. Even with a salary of \$75,000 the profits to the Yankee club put a million or more dollars into their great stadium. Yet today Ruth has been pushed aside.

The howl of the Eskimos over the loss of the game against Calgary, is heard all over Canada. To have the ball over the line, and the official not see it, seems to demand the use of the camera as in horse-racing. The camera should be unblinded and look upon the scene without trying to favor either team.

CANADIAN OPINIONS OF THE WEEK

"Why is it that we can find so little agreement concerning what we must do for our own material advancement in Canada?"—Sir Edward Beatty.

"More people are essential to Canada, if we are to solve within a generation or more our problems of taxation and railways."—F. C. Brown, C. M. A.

"Everyone in Canada knows that war is awful, but it cannot be stopped by frightening people."—Rev. J. Gordon.

"The hardened criminal not only costs Canada hundreds of thousands of dollars in lost property and increased taxation just to keep tab on him, but he or she constitutes a very grave social problem. To put an earlier stop to such criminal careers, Canada should adopt a law similar to the Baumes Act in the United States, which provides that a criminal shall receive perpetual imprisonment after a fourth conviction."—J. Alex. Benson, K. C.

"Provincialism and sectionalism are current dangers which make Canada disunited and weak in the face of possible invasion."—Archdeacon F. G. Scott.

"The gravity of the outlook in Canada is such that every responsible Canadian should do something about it, not simply say that something must be done."—Col. Irving P. Rexford.

"Apparently, civilization refuses to be buried. It has been on its way upward for ages, and judged by current happenings in the world at large, it still has a long way to go."—Jackson Dods.

"Canada has come through a series of great physical achievements, but one of our problems or troubles is that we have not been thrown enough on our own mental resources."—D. B. Maclellan.

BIG BEN

The PERFECT Chewing Tobacco

More Health In Bread

The fact that the hitherto discarded embryo of the wheat kernel contains enormous nutritive value might well be considered in promoting the more extensive use of the major bread cereal in this country, provided the millers can be persuaded to reform their manufacturing methods to ensure that the full value of the grain is passed on to the consuming public.

By eliminating the embryo from the milled product millers have been able to produce a flour which yields a presumably very fine white loaf, extremely attractive in appearance, and therefore readily saleable among the public.

Unfortunately, however, the desire to present to the public a white loaf of seeming beauty has resulted in the sacrifice of some of the wheat's most healthful ingredients and substances essential to the support of a well balanced diet.

When one considers the substantial percentage of the nation's bulk food formed by bread the enormous loss to the consumer represented in the rejection of its most nutritive ingredients is more than unfortunate. It might more properly be termed a calamity.

A Stimulant To Consumption

Dietitians and dietitians have known of the health value of whole wheat flour for some considerable time and almost daily one reads of the advocacy by prominent members of the medical profession and medical writers of the use of whole wheat bread as a health measure and as a corrective for certain forms of indigestion and weakening teeth.

It is only comparatively recently, however, that the full extent of the worth of whole wheat bread as a builder of a sound human frame has been determined by scientific and analytical processes as well as by the results of practical experimentation on the human constitution.

These scientific discoveries show that the embryo, or germ, of the wheat kernel is rich in vitamins A and B, E and G, all of them of great value in building up the human body and all playing their part in preserving it in a healthful condition; yet these valuable constituents, under present methods of manufacturing flour are treated as offal and thrown into the discard.

That the consuming public is not yet fully awakened to the loss it is sustaining as a result of existing milling practices is quite evident; otherwise there would be an insistent demand for bread made from whole wheat flour. When consumers recognize the value in terms of health represented in bread baked from flour containing the entire germ, no doubt the millers will accede to public requisition without raising any objection, and the knowledge that the bread they then get is doing much to promote their health should stimulate the public to increase its consumption of bread.

A Worthwhile Study

Commenting upon these discoveries the Western Retailer in an article in its September issue printed some remarks well worthy of study when it said:

"It is high time that the Canadian Government, the milling interests and bakers joined together, to give the Canadian public the real facts about the food value of wheat. Especially in this true view of the fact that every advance in knowledge that has been made by science in the last thirty years has tended to show that one of the richest sources of useful vitamins (which are now becoming better understood) is the embryo of the wheat berry.

"The first baker to show the public a loaf of bread in which the full value of the embryo has been retained should receive the grateful thanks of the wheat farmer, the grain interests and every public servant whose interest is maintaining public health."

Education Needed

Those who are fortunate enough to be able to get bread baked from genuine whole wheat flour are well aware that the loaf thus produced is darker in appearance than the bread produced by "sterilized" white flour and the baker who produces such a loaf is not likely to get all the thanks he deserves, unless the public is prepared to accept his product.

In other words what is required is a program of public education on the virtues of whole wheat bread as the first step towards creating the necessary demand. Should the governments decide upon such a program, there is little doubt that they would receive the hearty support of the medical profession and of all those who are now aware of the health value of the wheat germ.

The economic importance of such a program should not be overlooked either, for a realization of the value of bread to health would naturally be followed by an increased consumption and bread would, in actual fact, again become the staff of life—and health.

A Conductor's Privilege

The question of whether a conductor can jump aboard his moving bus has been settled in magistrate's court at Georgetown, British Guiana. Conductor Albert Manover was charged under a traffic ordinance with boarding the moving vehicle. The magistrate acquitted him, ruling the conductor had the "lawful authority" to do so.

Amsterdam, has a river called "Y," China has a city called "U," and Sweden has a town called "A."

DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE. This advertisement can explain what this mineral tonic is and why it is so valuable for Rheumatism, Stomach, Kidney, Nervous, Piles, Catarrh, Scars, Female Ailments, etc. It is not a patent medicine. Free information.

Has Smith Little Job

Charles Smith, head keeper of the San Diego Zoo, has a neat little job on his hands—driving two giraffes from New York to California in a truck. Giraffes are regarded as the hardest of all animals to transport, and this is the first time a trans-continental shipment will be tried by truck. The giraffes are coming in from Africa on a freighter.

Trench Revealed Coal

One Leeds resident reaped a neat little profit from England's mid-week war scare. The last five feet of a nine-foot trench Henry Varley dug to shelter his family from air raids turned out to coal. He shovelled out two tons and there was no sign the seam was near exhaustion.

A crow with pure white wings has just been seen in Scotland.

There are 200 distinct bones in the human body.

Collective Security

Justice In The End Is Sure To Prevail

The phrase "collective security" has come to have a bitter taste in men's mouths. Yet in the long run there is no choice between collective security and ruin. In the long run the lives and property of peaceable, non-offending men and women of peaceable, non-offending nations will be made safe or civilization will die. And it will not die. It is a far tougher organism than those who assail it and those who betray it are willing to believe. It has come out of pain and sweat and sacrifice. It has come out of the minds and hearts of men and women turning away from ease and softness to do hard tasks. It has come out of hopes and dreams and visions. It has been defended on battlefields and on sinking ships and in the narrow room of poverty. Those who have built it, those who now sustain it, the humble and obscure as well as the powerful—are slow to anger, but like the mills of God, when once aroused they grind exceeding small. They can be driven back and defeated for a day, a week, a year, but not forever. There is a justice in the world, which has no doubt of it. In the end it will prevail.—N.Y. Times.

Cats Live In Luxury

Nothing Too Good For Six Pets Of English Woman

In a nine-roomed house overlooking the sea at Barton, ten miles from Bournemouth, England, six cats live in the lap of luxury.

Each has its own room, bed and dishes, and a housekeeper is employed to look after their every whim. Four times a week a taxi from Bournemouth brings their food—the best steak, fish, rabbits, milk and cream.

The cats are the property of Mrs. Agnes Burrell of Bournemouth. Originally she had only one cat, but it so captivated Mrs. Burrell, a childless widow, that she became the extraordinary lover of cats that she is to-day. They are her main interest in life and nothing is too good for them.

More Modern Setting

Horses Of R.C.M.P. Giving Place To Cars And Planes

That picture of the Royal Canadian Mounted Police officer, astride his faithful steed, scanning the prairie stretches with hand upraised to hat brim against the rays of the setting sun, favorite of artists, magazine readers and movie fans, is giving place in real life to more modern settings. Soon the northern constable, on patrol, will be peering from the window of a speeding aeroplane.

And, according to recent announcements, prairie detachments will be listening for the voice of the wireless "calling all cars."—Edmonton Journal.

The banyan tree of the East Indies sends down new roots from its branches. These become auxiliary trunks and allow the tree to grow over a large area of ground.

There are more than 25,000 taxis in New York City.

HOW YOU CAN ATTRACT MEN

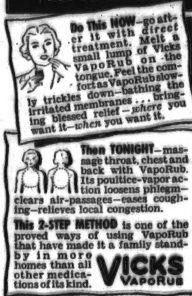

Of course, you have no men friends if you've left yourself become dull, cross, and nervous. Men like lively, peppy girls—girls with plenty of energy to go places and enjoy life. Don't let love and romance pass you by. Help build up your pep and you, too, should have gay friends.

Here's good advice: Start taking time-proven, reliable Lydia E. Pinkham's Vegetable Compound and note the difference. This famous Compound, made especially for women from whom come the most distressing ailments, helps Nature tune up your system and thus soothes jumpy nerves and gives you more pep to really enjoy life. Tear out this notice NOW as a reminder to get a bottle of Lydia E. Pinkham's Vegetable Compound TODAY without fail.

For over 60 years one woman has told another how to get "smiling" and "bright" from female functional disorders with Pinkham's Compound. Let it help YOU.

GRIPPED BY MISERY OF A SORE THROAT!

Do this NOW—go to it with direct treatment—Vicks VapoRub. It's the only VapoRub that has made it a fact—stands by in more than 100 other medicines of its kind.

Then TONIGHT—massage throat, chest and back with VapoRub. Its positive-vapor action loosens phlegm—clears air-passages—eases coughing—relieves local congestion.

This 2-STEP METHOD is one of the proved ways of using VapoRub that have made it a fact—stands by in more than 100 other medicines of its kind.

Compulsory In France

Children Barred From Schools Unless Immunized Against Diphtheria

In France immunization against diphtheria has for some time been obligatory for soldiers. During the present year the provision has been extended to include all school children. All children are required to be immunized against diphtheria in the first or second year of life. No child can be admitted to school without a certificate showing that this law has been complied with. All school children up to the age of 14 years, who have not been previously protected against diphtheria must submit to immunization as soon as possible after notice has been given in the official gazette. This announcement appeared on June 3rd. The Toxoid administrations are free. It is said that any necessary outlay will be amply compensated by a marked reduction in the present mortality from diphtheria of 2,000 deaths and of over 20,000 cases annually.

In Canada, we attempt to gain the same results by education of the public as to the value of the protection afforded by immunization against diphtheria. The results have been gratifying. Whole communities where the little children have received doses of Toxoid have for years remained immune to diphtheria. The work is rapidly extending year by year. Soon, through the effect of voluntary immunization Canada will be rid of this dangerous malady.

All children have Toxoid as soon as they are six months of age as possible. The great mortality for diphtheria has been in children under the age of five, although children of all ages contract the disease. Do not neglect the use of Toxoid—your health officer or your family doctor will arrange it for you.

Timely Information

Trans-Canada Air Lines Gives Regulations For Baggage

According to Trans-Canada Air Lines, this is what the well-dressed woman can carry with her on a flying trip without exceeding the excess baggage regulations: "Suit case 21½ inches by 16½ inches by nine inches; two street dresses; 12 handkerchiefs; jacket; one pair dinner sandals; evening gown and bag; four pair gloves; six pair hose; lingerie; lightweight dressing gown; one pair mules; nightgown; jewelry case; sewing kit, rubberized toilet kit with cosmetics in lightweight containers." All this, according to T.C.A., officials who claim to be versed in such matters, weighs three pounds less than the maximum 35 pounds of baggage allowed each passenger without charge. Furthermore, they state a woman can exist for six weeks with such an outfit. Men, they complain, are forever carrying too much luggage and are always a problem to air line baggage masters.

Where Fear Reigns

The Buffalo Courier-Express says if the German people appeared apathetic to the impending shadow of war, it might be due to the difficulties of expressing one's fears openly in a country where there are suspiciously broken up as a crowd, police attend every social gathering and even the woods have telephonic ears.

No Tickets Fixed

Policeman Donald Galbreath of Portland, Oregon, has a fine time these days just laughing at friends who want him to "fix" their traffic tags. Galbreath recently paid \$13 for traffic tags and towing charges on his automobile after it was towed to the police garage because of illegal parking.

A man's skull contains 20 bones, whereas a codfish's skull has 68.

Rewarded For Kindness

Ballet Dancer And Hospital Attendant Receives Large Fortune

It's a story strange as fiction with a typical surprise ending—this true-life tale of how a former assistant theatre manager and a ballet dancer were kind to an eccentric old woman and reaped an estimated \$1,000,000 reward.

The woman was 70-year-old Mrs. Edna Morse Allen Elliott, a quaint haunter of film houses who became known as "New York's Champion Movie Fan".

A feminine hermit, she died friendless and alone in her three-story brownstone house in West 88th street.

Her will disclosed she had left securities and \$80,000 in jewels to Rosalie Spatcher, a ballet dancer, and the residue to William Reilly, former assistant manager of the Roxy Theatre. They had "helped to make the recent years of my life more pleasant," Mrs. Elliott wrote in her will.

Reilly, whose sudden wealth lifted him from a \$52-a-month hospital attendant's post, said attorneys told him the estate was valued at \$1,000,000.

He said when he first met Mrs. Elliott in 1927 he thought she was poor—she wore old-fashioned dresses with leg o'mutton sleeves—and arranged for her to have a front row seat every Thursday when the theatre changed its program. Afterward he would discuss the show with her briefly.

The theatre closed temporarily in 1932 and Reilly lost his job. He never saw Mrs. Elliott again.

She then began attending Radio City Music Hall and during rehearsals Miss Spatcher often walked over to chat with the lonely old woman in the front row seat. She never knew Mrs. Elliott's identity or saw her outside the theatre.

It was some time before Reilly learned of his fortune. He said he had dodged Mrs. Elliott's lawyers for several days—thinking they were trying to serve him with a summons.

SELECTED RECIPES

CALUMET SUGAR COOKIES

2½ cups sifted flour
1½ teaspoons Calumet Baking Powder
½ teaspoon salt
½ teaspoon nutmeg
1½ teaspoon lemon rind
½ cup butter or other shortening
1 cup sugar
2 eggs
1 tablespoon rich milk or cream
Sift flour once, measure, add baking powder, salt, and nutmeg, and sift again. Cut with floured 2½-inch cutter and sprinkle with sugar. Bake on ungreased baking sheet in oven (400 degrees F.) 10 minutes, or until done. Makes 2½ dozen cookies. Cookies may be cut in fancy shapes and frosted or decorated with colored candies, sugar, citron, nuts, and candied cherries. They are especially suitable for children's parties or for holiday entertaining.

PUMPKIN PIE

2 cups cooked pumpkin
½ cup Bee Hive Golden or White Corn Syrup
¼ cup white sugar
2 eggs
1 teaspoon St. Lawrence or Durham Corn Starch
½ teaspoon cinnamon
½ teaspoon ginger
½ teaspoon nutmeg
½ teaspoon salt
1½ cups milk
1 teaspoon St. Lawrence or Durham Corn Starch
Beat eggs light and add to pumpkin already mixed with syrup, sugar and spices. Blend corn starch with milk and add. Mix all thoroughly and pour into deep pie plate lined with good pastry. Bake in hot oven 450 degrees F. first 10 minutes, then reduce heat until filling set, in all about 30-35 minutes. Serve with whipped cream.

Considered World Record

Way In Which Britain Has Eliminated Stum Houses

The Municipal Journal, London, says nearly one thousand persons are being moved every day in Great Britain from stum houses to new and decent dwellings.

To-day one-third of the population are living in post-war houses. Since the end of the war over three and a half million new houses have been provided in England and Wales, and of these more than a million have been built by local authorities.

What other country can show such a record in this sphere of social improvement?

A pair of moose antlers in the Chicago Field Museum measure 77½ inches across and are said to be the world's largest.

A giraffe has only seven vertebrae—one-half as many as a hummingbird.

EASE PAIN

of Rheumatism Neuritis Neuralgia Quickly

SIMPLY GET "ASPIRIN"—FOLLOW EASY DIRECTIONS BELOW

1. Take 2 "Aspirin" Tablets with a full glass of water the instant you feel a pain in any part of your body, repeat as often as necessary, according to directions.

To relieve pain of rheumatism or neuritis quickly, try the "Aspirin" way—shown above.

People everywhere say results are remarkable. "Aspirin" Tablets are economical, which makes the use of expensive "pain remedies" unnecessary. If this way fails, see your doctor. He will find the cause and correct it. While there, ask him about taking "Aspirin" to relieve these pains. We believe he will tell you there is no more effective, more dependable way normal persons may use.

Demand and Get "ASPIRIN"
TRADE-MARK REG.

Royal Research Ship

Britain's Magnetic Survey Vessel Will Fly White Ensign

The magnetic survey vessel Research will be ready for launching in February in England, and is to be put into service in the autumn of next year. She is being built at the cost of the navy estimates, but she is not to be described as "H.M." her functions being purely civilian and scientific. At the same time the King has ordered that she be described as "Royal Research Ship", and she will fly the White Ensign.

What is this isolation of which we talk, with steamships making the Atlantic crossing in less than four days and airships covering the distance from New York to Berlin in 20 hours?

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums. Aids digestion, relieves stuffy feeling after meals. *Helps keep you healthy! Take some home for the children too—they will love it!*

Ah—it is a grand idea sweetening my morning cereal with BEE HIVE.

TRY IT TOMORROW

The Snow Fence Silo

Can Be Built Cheaply As A Temporary Expedient

Temporary silos constructed with snow fencing commonly employed for the protection of highways during winter, have been tested at the Experimental Farm, Brandon, for two seasons, states R. M. Hopper. This type of silo is built in sections the depth of the snow fence, and each section is filled with silage before the next one is erected. The silo is circular, and may be constructed of a suitable size to accommodate the amount of feed to be stored. For efficient silage making, the silo should be twelve to sixteen feet deep. In order to make the snow fence air tight it is required to be lined with a special heavy paper known in the building trade as "silicraft" or "three."

The snow fence silo used at Brandon was 14 feet in diameter, and four sections, or sixteen feet high. One length of fence 50 feet long is sufficient to make a circle of this diameter and provide an overlap to permit the ends to be securely tied with wire. The paper lining was held in place during the process of filling by the use of clothes pins. After the first section was completely filled, the second section of the silo was added. The upper sections of the silo were slightly smaller in diameter than the one immediately below. This permitted the sections to telescope one into the other as the silage settled. It is essential to have the ground on which the silo is erected perfectly level so that the structure will remain upright.

The silo, fourteen feet in diameter at the ground level and about twelve feet in diameter at the top, and sixteen feet high held approximately 30 tons of corn silage. The cost of materials for construction were \$17.50 for the fence, and \$3.50 for the paper used for lining. While the snow fence can be used for a number of years, the paper can be used only once. The cost of paper was approximately 28 cents per ton of silage stored. This cost, in addition to the annual depreciation of the snow fence, makes this type of silo more costly on a per-ton-storage basis than the permanent silo.

The snow fence silo affords little protection from frost unless it is well banked with straw or other material. Care must be exercised during the process of filling to prevent the paper from being torn and admitting air to the silage. With silos of this type, the quality of silage removed is quite satisfactory.

From the experience gained at Brandon, the snow fence silo is not the most economical type when considered over a period of years. As a temporary expedient its use can only be recommended in areas where the trench type of silo cannot be employed on account of the nature of the soil, or lack of drainage. The main use of a snow fence silo would seem to be restricted to providing extra storage space in seasons when the silage crop cannot be accommodated in the regular silo. Under such condition, the silage from the snow fence silo should be fed first in order to escape excessive freezing.

One Grand Attraction

But Lancashire Man Sometimes Missed Out On That

A Lancashire man, much against his own desire, was persuaded by his family to desert Blackpool or Douglas this year for a quieter place. Unfortunately the family went to extremes and chose a spot which apparently abhorred Lank Parks and the like and catered solely for lovers of pure tranquility. The only amenities were the sea and the air. On his return the man lodged a complaint to a full tap-room. The only diversion lay in walking about or sitting down. There were candles in the digs, candles in the pub, and everybody expected to be in bed by ten.

"But surely," a listener suggested, "there must have been some sort of amusement?"

"Aye, there were," the complainant ceded. "They were mending it road and they'd one of them new concrete-mixers working. But unless they were their early the couldn't get near."—Manchester Guardian.

Negroes Have Right Idea

Apparently there is something that can be learned from the negro race, says the Regina Leader-Post. They are not given to worrying themselves to the point of taking their own lives. They have a philosophy of life that might invite emulation. They are often jolly and rollicking. They recognize the value of song as a life tonic. When they sing they put a lot of heartiness into it.

About three million birds have been banded in North America since 1920.

The Speed Era

Motor Cars Are Now Re-making The Modern Life

It may be rather late in the day to remark that the automobile is re-making modern life. The change began a quarter of a century ago, and we are accustomed to it by now. But it is still under way.

Passenger steamship lines on inland waterways and our seacoasts are growing fewer, year by year; the branch railroad lines that led to watering places, summer resorts and remote communities are giving up the struggle one by one. The triumph of the automobile is becoming more and more complete. As it does we become more and more dependent on it.

All of which means that something seriously is going out of life. We like speed, and we are getting it in steadily increasing quantities; the only trouble is that the slower pace is becoming impossible for us. We have to use speed whether we like it or not.

We shall live through it, of course, without much trouble. Certainly we would not go back to the pre-automobile age, even if we could. But we might live a trifle more pleasantly if we could manage to save a little of the old ways of doing things. It is not altogether a good thing to rely too much on any one of our machines. We are placing ourselves more and more at the mercy of the automobile. It is a priceless servant—but it may turn out to be a rather exacting master.—Victoria Times.

Checkmate For Washington

Officers Found One Lady Not Taking Orders From Him

While reconnoitering in Westmoreland County, Virginia, General Washington's officers came upon a team of fine, sleek horses being driven to the plow by an elderly Negro.

"Hello, good fellow," one of the officers called out, "we must have those horses. They're just what we've been looking for!"

Without paying any heed, the venerable man turned and began to plow another furrow. When he returned, the officer again demanded the horses, but all the plowman would say was, "Better see Missus! Better see Missus!"

The officers repaired to a neat farmhouse near by and, knocked upon the door, where they were greeted by an elderly woman of grave but kindly charm. They repeated their demand.

"Upon whose orders are you setting?" demanded the lady.

"Upon the orders of our chief," they replied.

"Four chiefs?" the householder exclaimed. "Who is your chief, pray?"

"General George Washington, Commander of the Revolutionary Army," one of the officers replied grandly.

"You go back," replied the lady with a smile, "and tell General George Washington for me that his mother says he cannot have her horses."—Christian Science Monitor.

Proved A Prize Winner

Five-Cent Cat Has Won Her Second Blue Ribbon

A year ago a seven-year-old lad appeared at Louis E. Walker's hamburger stand in Vancouver with a cat clutched in his arms.

"Mister, wanna buy a cat?" he asked.

After a little dickering the deal was closed with Walker handing over five cents as the purchase price.

The cat, now carrying the name of Princess Han, won her second blue ribbon at the Canada Pacific exhibition there.

Boys Enjoyed The Joke

Sons Of Princess Mary Put Good One In Their Paper

Viscount Lascelles, 15, and Hon. Gerald Lascelles, 15, amateur publisher sons of the Princess Royal (Mary) and Earl of Harewood, have sought to settle "once and for all" the pronunciation of "Harewood," which, they say, is "Harwood."

In "The Harewood News," chronicle of village life, produced in duplicated typewritten and edited jointly by the brothers, there appeared their solution of the argument with an appended account of an overheard discussion between two women in a Leeds bus.

One woman, seeking to drive home a point, said:

"Well, Mrs. 'iggins they can say what they like, but I shall always call it 'arewood with the haccent on the hatch."

The world's largest bell is in a Buddhist temple in Japan; it is 36 feet high and can be heard two miles away.

SPEED PILOTS WHO ENTERED IN THE U.S. NATIONAL AIR RACES

Red haired Jacqueline Cochran not only won the eighth Bendix trophy race to triumph over 10 experienced male pilots but set a new transcontinental air record for women. Flying from Burbank, Calif., to Bendix, N.J., in 10 hours, seven minutes and 10 seconds. Outstanding speed pilots entered in the race included, top, left to right: Roscoe Turner, Lee Gelbach and Frank Fuller, last year's winner of the Bendix Trophy. Bottom row, left to right: Jacqueline Cochran, winner; Art Chester and Earl Ortman.

An Unusual Theatre

Building In The Heart Of Budapest Is Underground

An unusual open air theatre has been completed on an island in the Danube, in the heart of Budapest. To preserve the natural beauty of the island, the building is underground and even the orchestra is invisible. The cloakrooms are hidden by bushes and the passageways leading to the stage are masked by grassy banks and shrubbery. The auditorium which seats 3,500, is so constructed that it seems part of the natural terrain.

War-Time Substitutes

Japan's search for war-time substitutes has led to 4,000 inventions, ranging from porcelain telephones to waterproof paper cans and buckets. Celluloid razor blades and sunburn hats were among articles displayed at a Tokyo exhibit.

Speaking of broad-mindedness, a suspected spy arrested at London admitted he was doing secret service work for three foreign nations.

Luther Burbank carried on experimental work with plants for more than 50 years.

Derived From Latin Word

But Opinions Differ As To Real Meaning Of Pretzel

The name "pretzel," according to some who have delved into its history, comes from a Latin word meaning "a little reward." Others declare that the word has the same derivation as the word "prayer."

Pretzel once appeared in the shape of large rings to be worn about the neck before they were eaten. They were supposed to keep evil spirits away. Pretzels sometimes were hung on fruit trees with the expectation that they would help the trees to bear well. Even to-day an old superstition about pretzels survives: if one breaks a pretzel ceremoniously while he makes a wish, the wish will come true.

Easy Way To Fish

There is a fisherman in North Queensland who does not believe in waiting for the fish to "bite." He uses a bush vine with strange properties. When the vine is crushed and thrown into the rock pools, the fish float to the top in a semi-conscious condition.

Corn is grown in every state in the Union.

Scientific Finding

New Evidence That Man Lived In North America During The Ice Age

The Carnegie Institution announced its scientists had found new evidence that man lived in North America during the time of terrific volcanic activity, near the end of the last ice age.

An expedition exploring caves in southern Oregon found unmistakable evidence of human beings having lived in them during several periods of volcanic eruption, the announcement said. Earliest occupation of these ancient homes probably was more than 10,000 years ago.

Fidelity To Home

Pigeons and Hens Do Not Easily Recognize New Quarters

The pigeon's fidelity to home is sometimes oddly expressed. For example, in the war a sudden order was received from the office known as "O.C. Pigeons" to remove the London buses, they used as mobile dove-cotes from the neighborhood of Popperidge to the neighborhood of Arras. When the pigeons were released from their new home they flew back to Popperidge and were found roosting on the ground exactly where the buses had stood.

The domestic hen has a like blind fidelity to a particular place. A poultry farmer, who was accustomed to remove his portable houses across his fields found that he had to limit the migration to a very few yards. If the houses were shifted even a few yards further than the normal, the hens quite refused to enter them, but went to roost on the exact spot from which their quarters had been removed. This was done though the houses were obvious to the most myopic vision and the meanest intelligence.

A fidelity to place, of like exactitude, has been noticed during certain experiments with bees. Though they will return to a transported hive, they will not always return to a hive removed only a few yards in their absence.

New Broadcasting Station

Work On Transmitter Near Watrous, Sask., To Be Speeded Up

Construction of the Canadian Broadcasting Corporation's new 50,000-watt transmitter near Watrous, Sask., will be speeded up, Gladstone Murray, CBC general manager, said at Ottawa recently. The new station will cost about \$250,000 and will serve listeners in Saskatchewan. Mr. Murray said that a new plan will be worked out for the five kilowatt station at Lulu Island, near Vancouver, in order to provide better listening facilities for inland British Columbia.

The present station serves part of the coast, the Fraser Valley and Vancouver Island fairly well but is not adequate for the interior, he said.

Soaking the rich is like trying to turn a fire hose on one man in a crowd without wetting anybody else.

What's In A Name

Every-Day Terms Familiar To Some And Puzle To Others

What is a "byeman"? or a "bird-sel"? Many Canadians will not recognize the former as the equivalent of our terms "herdsman" or "stableman"; and "birdsel" apparently means "cock" in good Canadian dialect.

These are a couple of the unfamiliar phrases gleaned from "The Scottish Farmer," a popular farm journal published in Glasgow, but they are not alone in their strangeness to most Canadian ears. From a single page of one issue of that paper a number of oddly turned phrases have been selected.

Exactly what "Cheviot ewe hoggs" can be remains a mystery in this particular quarter. Apparently a "Gyp" is some sort of horse, and a "Quey" is a variety of cow—but more particular knowledge is hopelessly lacking.

"Inborn farming knowledge" is a phrase that rings off-key in a country where it is taught that one is born with intelligence, but has to gain knowledge. "Thereby" is used to supplant our "thereabout." A half-trained dog is "Done for the hill." And a Government official seeking commercial employment will be "disengaged when suited."

These are only a few examples of differences between Scottish and Canadian farmers' dialect. There are thousands of others, many of them probably more striking than those cited. And when taken used by English-speaking farmers in the Old Land fall so strangely on the ears of Canadian agriculturists, what hope would one have of understanding the specialized vocabulary of a person in another walk of life?

Many city folk understand but few of the everyday sayings used on the farm. To them a calf is simply a "little cow," an equine of any age, size or sex is a "horse," and grain of any variety is "wheat." And don't quit them about the meanings of such mysterious words as "whiffletree" and "dead furrow"—the replies would probably be "a sort of time" or "a deceased fur-bearing animal."

But wait a minute. These same city people have their own every-day terms, many of which are Greek to the farmer. Let's try a few newspaper terms. "Deadlines" and "lay-outs" do not necessarily have anything to do with mass America or knockouts. No, the farmer is not familiar with newspaper phraseology; but neither is the shoe clerk acquainted with the druggist's lingo.

The English language? Actually, it does not exist as a universal medium of conversation for English-speaking peoples. Every walk of life, every locality has its own special terms arising from specialized environment or unusual local conditions. Each person has his own individual language, just as he has his own appearance and his own voice. But dump all of these single vocabularies into a pot, stir until all the ingredients are thoroughly mixed, and decant slowly—the complex solution which results is the language that girdles the globe.

Had Weakness For Thistles

Scotch Emblem Was Used Lately In Illinois Home

Because the late James A. (Wheat King) Patten liked Scotch thistles, auctioneers were dubious about the success of the sale of furnishings in his mansion at Evanston, Ill. Nine marble and mahogany fireplaces are carved in a thistle pattern, the hands of a specially made grandfather's clock are cut out like thistles, and a thistle design predominates the windows. The flooring, light fixtures, wall paper and table legs also carry the thistle motif.

Had Travelled Far

A postcard dated Los Angeles, California, December, 1927, and addressed to a party in London, Ont., has finally arrived after 11 years of wandering throughout the world. Its last resting place before arriving in London was Canton, China. Cheerfully written on the card were the words: "A Merry Christmas and a Happy New Year."

Prefers A Bicycle

Rachel Colvill, a nurse of Killegreen, Dumfriesshire, Scotland, has cycled 75,000 miles in 23 years of ministering to the sick in her community. She has authority to hire an automobile for her work but she says: "I prefer my bicycle."

Bats do not fly at high altitudes, as do birds. They fly between 40 and 50 feet above the ground, the point occupied by most of the night-flying insects.

Bats are hunted for food in Africa.

BOOSTING BRITAIN'S FITNESS PROGRAMME

Every parade and physical display in England these days finds the "Fitness Wins" propaganda prominently displayed. Launched in an effort to make the young people in the British Isles exceptionally healthy and strong, the "Fitness Wins" campaign is finding many followers. This picture taken at Southend's hospital carnival shows the "Fitness Wins" contingent in the procession.

LOCALS

Mrs. Watkinson is visiting in Holden for a week.

Mr. Don Nichol arrived on the bus last Tuesday evening for a short visit.

W. Masson, M.L.A., motored to Edmonton last Wednesday on business.

Born, to Mr. and Mrs. Art Hockett, on Wednesday, October 19th, a daughter.

Born, to Mr. and Mrs. Chris Lindbeck, on Thursday, October 13th, a daughter.

Master Ernest Carter was operated on for appendicitis in the Wainwright hospital on Wednesday, October 19th.

The Roseberry and Alma Mater Ladies' Aid annual fowl supper will be held on Nov. 4. Watch for further particulars.

A tea will be held in the Legion hall on Saturday, Nov. 5, under the auspices of the Canadian Legion Ladies' Auxiliary. Poppies also on sale.

St. Margaret's W. A. card party and dance will be held at Battle Heights on Friday, Oct. 28, together with fall bazaar. Everybody welcome.

The infant daughter of Mr. and Mrs. Ivan Archibald, who has been seriously ill in the Wainwright hospital for the last few days, is reported to be coming along nicely.

Robert Maguire has been confined to his home for a few days with the flu. The flu seems to be making the rounds lately, a number of folks are reported having had it.

I have taken the agency for the Wind Changer Wind Electric. For prices and other information see or phone the undersigned. I will also take contracts for wiring buildings.

—Lloyd Erickson, phone 408, Irma.

Mr. E. R. Erickson has had a 1000 watt wind electric plant installed on his farm southwest of town. This plant which will supply all the farm buildings with electric light will be a great convenience, saving time and labor for all the family.

Miss Joyce Cook, daughter of Mr. and Mrs. Archie Cook, celebrated her fourth birthday on October 9th at her home when eleven relatives from Galahad, including her father's parents, and also Mr. and Mrs. E. Jones, parents of Mrs. Cook, dropped in as a surprise and spent the day.

Threshing oats seems to be the order of the day, and most machines are running merrily these lovely days.

Messrs. Batchelor, Milton, Steele, Walker and Wilbraham, representing the Irma Branch No. 112 of the Canadian Legion, B.E.S.L., attended the annual meeting and smoker of the Hardisty Branch No. 86 at Hardisty on Tuesday evening, Sept. 18th. The boys reported a wonderful time.

A very enjoyable time was had at the home of Mrs. Arnold on Monday evening, Oct. 17, on the occasion of a surprise shower in honor of Miss Kay Shaw, who is being married soon, and leaving our district. Miss Shaw, who was genuinely surprised, received many beautiful gifts showing the esteem in which she is held.

The regular meeting of the Alma Mater and Roseberry Ladies' Aid will be held on Thursday, Oct. 27, at the home of Mrs. Victor Larson. Devotional will be taken by Mrs. C. G. Lovell. Program by Mrs. Seth Oldham. Hostesses are Mrs. A. A. Fischer and Mrs. R. Patterson. Will all members and friends please make a special effort to attend, as plans for the annual bazaar and fowl supper must be completed.

—Mrs. C. Wilbraham, Sec'y.

"Wherever they may be, women are against war. They bring life into the world and they know that war destroys their life work."—Edith E. Cockcroft.

The Women's Institute

The monthly meeting of the Irma W. I. was held in the Legion hall on Thursday, Oct. 6, with Mrs. R. C. McFarland presiding. There were 24 members and one visitor present.

Among business discussed was the annual bazaar, the date of which was set for Saturday, Nov. 26th, to be held in Kiefer's hall. Two very interesting papers on Canadian Industries were given by Mrs. E. Martin and Mrs. G. Batchelor.

—Mrs. C. Wilbraham, Sec'y.
